SOC Analyst (m/f/d)

Who are we?

- We are an international, fast growing and innovative tech company in the field of cybersecurity
- Our service offering includes a self-developed vulnerability scanner as well as pentesting, a cyber defense operations center, security awareness trainings and expertise in blockchain technologies
- We create awareness for cybersecurity in the digitalization process
- Cybersecurity knows no borders: our locations are now in Cairo, Zurich, Berlin, Cologne, Abu Dhabi and Flensburg

Your tasks with us:

- Support and participate in the establishment and further development of a Security Operations Center (SOC).
- Investigate security-related incidents and take appropriate countermeasures
- Use the tools of the Security Operations Center (SIEM, vulnerability scanner, IR, ...)
- Analyze and assess security incidents in our central security platforms (Threat Hunting)
- Implementation and optimization of playbooks
- Detailed documentation of incidents in a ticket system / SIEM system and preparation of corresponding reports
- Monitoring and detection of attacks and deviations from normal system behavior and initiation of appropriate countermeasures
- Development of concepts for the containment and prevention of attacks
- Reputation analysis of Indicators of Compromise (IOCs)
- Execution and evaluation of automated vulnerability scans and communication of the results to the customer

Your profile:

- At least 1 years of professional experience in IT security or 1 year as an analyst
- Strong interest in IT security topics
- Experience in blue-teaming (e.g. SOC, incident response) is an advantage
- Relevant certifications in the field (CEH, Security+, CySA+, ...).
- Ideally knowledge in several of the areas listed below: IT security, security products, incident response, Windows, Linux, networking, active directory, internet technologies.
- Very good communication skills
- Conceptual skills as well as an analytical, solution-oriented way of working
- Very good English skills, both written and spoken

What do we offer you?

- Health insurance
- Transportation depending on position and rank
